

ANNUAL REPORT

MAKING A DIFFERENCE WITH CONCERN, COMPASSION & RESULTS

“Every time I work with the MKF, which has been on several occasions, I feel genuinely helped and supported, and I think it is obvious that the organization does whatever it can to be an outstanding resource for kidney patients all over the state. From a healthcare standpoint, there’s only so much I can do for a kidney-patient, and the MKF has consistently filled in the crucial gaps in education, support, security, raising awareness, offering services and events, etc... I know I could not do my job sufficiently without their help, and I know many of my coworkers and colleagues would (and do) say the same. From screenings to support groups to 5k walks, MKF offers such a wide variety of invaluable programs and resources for the community. MKF will go above and beyond to protect and support Mississippi’s kidney patients, so they deserve above and beyond to support their efforts.” **Rebecca Butz, renal dietitian, UMMC**

“I’ve been in the position of Renal Social worker for 18 years. There has never been a time when the MKF wasn’t around and available to provide us with the help we need to care for our patients. I just wanted to say thank you for all you have done for the Kidney Patients in MS and especially mine, always being there with support, encouragement, and information.”

**Steven Lloyd, social worker,
Fresenius Kidney Care
Vicksburg & Delta**

Message from the President

Dear Friends:

Every so often, after a long day of taking care of patients with kidney disease, I reflect on what it would be like to be one of those patients. Despite trying to place myself in their shoes, I still cannot truly fathom the mental and physical difficulties that they go through on a daily basis. From the burden of dialysis treatments three times a week, to the difficulties of complying with an exhaustive medication regimen, to the mental anguish when they have to face obstacle after obstacle, the trials that they go through are truly astounding. Even more amazing are those that triumph and don't allow their disease to define themselves. MKF exists to provide a glimpse of encouragement and hope to those who face such a difficult diagnosis.

What an honor it has been to have served as president of this outstanding foundation! The transition with a new executive director and associate director has brought a fresh prospective and new direction that is leading this organization toward new heights. I have thoroughly enjoyed working with members of the executive committee and board members and encourage all members to play a more active role in MKF as the directors restructure and delegate duties to allow all of our projects to succeed!

Daniel M. Habeeb, MD
MKF President 2017-2019

"I have practiced social work in Mississippi for over 24 years and I have worked with many populations and many organizations that help people here. In all that time, I have never witnessed as much assistance and support that is provided to the renal population of Mississippi as through the MS Kidney Foundation. People afflicted with renal disease in Mississippi are truly blessed to have their support." **Paula Beemon, social worker, Fresenius Kidney Care Forest & Magee**

OF COUNSEL

Robert Wise, *Sharpe & Wise*

The mission of the Mississippi Kidney Foundation, chartered in 1965, is to serve Mississippi kidney patients by providing quality programs and services, to provide education and screenings to promote the prevention of kidney disease, and to promote organ donation throughout the state.

"I don't know what I would do without MS Kidney Foundation. There are so few resources out there for our dialysis patients. At least half of my patients are trying to live on less than \$1000.00 a month. Some of them live 20 to 30 miles from the unit and must provide their own transportation to dialysis, three times a week. In addition, they have frequent doctors visits, vascular access, and most of the doctors and the hospital are 40 miles from their home, some more than 60 miles. Medication prices continue to go up and there are fewer and fewer patient assistance programs for the expensive binders they take. I am grateful that our doctors donate so generously to MKF and I try my hardest to help with fundraising, because I see exactly where the funds are going!" **Ginger Sue Cooksey, social worker, Hattiesburg Clinic—Laurel Dialysis**

Facts About Kidney Disease

Kidney disease affects millions of Americans, and Mississippi has the highest rate of kidney disease in the nation. It is often referred to as a “silent” disease. Early stages have no symptoms; thus, education and awareness are crucial to preventing the disease and slowing its progression. Chronic kidney disease can be hereditary.

“The Mississippi Kidney Foundation is there for our patients. Services are easy to access; response time is quick and efficient. MKF does so much for dialysis patients, caregivers, and dialysis professionals. We are so blessed to have them!” **Lindsey Cosgrove, social worker, Fresenius Kidney Care Golden Triangle & Lowndes County**

What is the Best Way to Keep Your Kidneys Healthy? (Centers for Disease Control and Prevention)

- 1 Keep your blood pressure below 140/90, or ask your doctor what the best blood pressure target is for you.
- 2 Stay in your target cholesterol range.
- 3 Eat foods lower in salt.
- 4 Eat more fruits and vegetables.
- 5 Stay active.
- 6 Take your medications as directed.

Who is More Likely to Develop Kidney Disease? (Centers for Disease Control and Prevention)

Approximately 1 of 3 adults with diabetes and 1 of 5 adults with high blood pressure may have CKD.

In addition to diabetes and high blood pressure, other problems that put you at greater chance of kidney disease include: heart disease, obesity, and a family history of CKD. Kidney infections and a physical injury can also cause kidney disease.

Facts About End Stage Renal Disease (Center for Disease Control)

2014

In 2014, 118,000 people in the United States started treatment for ESRD, and 662,000 were living on chronic dialysis or with a kidney disease.

Men

Men are 64% more likely than women to develop ESRD.

Hispanics

Hispanics are 35% more likely than non-Hispanics to develop ESRD.

Adults

In US adults aged 18 years or older, the main reported causes of new cases of ESRD are diabetes and high blood pressure.

Adolescents

In US adolescents aged 13 to 17 years, the main reported cause of new cases of ESRD is glomerulonephritis (inflammation of the kidneys).

Programs and Services

Meeting the Needs of Kidney Patients

The Mississippi Kidney Foundation works directly with medical professionals to help identify patient crises. The MKF works with over 60 renal social workers and 50 renal dietitians at 80 dialysis units across the state to assess the needs and dietary assistance of patients on dialysis. Assistance is provided by MKF to patients for medications, transportation, utilities and much more, on a case by case basis.

MKF's GED program assists patients in finding free GED classes and provides a stipend for further schooling or job-hunting expenses once the patient passes the exam.

REAP and Awareness

The Renal Evaluation and Assessment Program (REAP) is designed to target those at risk for kidney disease through free screenings. Using StatSensors, the level of kidney function is determined in thirty seconds by a simple finger prick. Screenings are held throughout the state at health fairs,

In 2018-2019, MKF hosted over 70 free screenings for kidney disease. 3,756 individuals were tested, and approximately 13.6% of those screened had abnormal kidney function of varying degrees. The screenings were held across Mississippi in nearly 25 counties and in more than 30 different cities.

"The MS Kidney Foundation has helped me to solve transportation, prescription, and various resource issues that we have at our clinic. It has been helpful because Natchez has limited resources, and the Kidney Foundation is always able to help find a solution for our patients. These patients are already in a vulnerable state dealing with kidney disease;

it's our job as social workers to help them navigate resources to alleviate any more potential stress. The Kidney Foundation has helped with this greatly." **Jade Douglas, social worker, Fresenius Kidney Care Natchez**

employee wellness checks, and community gatherings. With over 7,000 individuals screened since 2016, an average of 10% of participants have abnormal kidney function.

A wide variety of awareness and prevention literature is readily available upon request, including the Jerry Rice “I’m a Kidney Fan” fans. Mr. Rice, who has family ties to kidney disease and Mississippi, serves as a spokesperson in the effort to spread awareness.

Kidney patients and their families enjoy several events, sponsored by MKF, throughout the year.

MKF partners with Mississippi Blood Services, Mississippi Organ Recovery Agency (MORA), and the UMMC University Transplant Department in a variety of ways to promote organ donation and support those going through the transplant process.

Patient Conferences

Patient conferences are held periodically for both patients and their family members/caregivers. Conferences are conducted across Mississippi.

from across Mississippi gather to enjoy food, fellowship and fun.

The 2019 Patient and Family Picnic was held on June 1 at the Mississippi Agriculture and Forestry Museum’s Sparkman Auditorium. Over 350 people attended the picnic. The lunch was free of charge for kidney disease patients and their families in Mississippi. Attendees enjoyed lunch by Catering by George’s and dessert by Schwann’s Ice Cream. Patients and their families played games, listened to patient testimonials and received balloon animals. There was also a free screening for kidney disease at the picnic. Dialysis patients who attended the picnic ranged from three months to 36 years on dialysis.

The 2019 Patient and Family Picnic was sponsored by The Bower Foundation, Fresenius Kidney Care, Pentec Health and The Transplant Pharmacy.

Pediatric Nephrology Holiday Party

The Pediatric Nephrology Holiday Party is held annually in December. Pediatric nephrology patients and their family members are invited to attend the party. Lunch is free of charge, and Santa usually makes a visit!

This year’s Holiday Party was held on December 11 at the University of Mississippi Medical Center’s Student Union. Over 20 pediatric nephrology patients attended the party with family members. Each pediatric nephrology patient received a Wal-Mart gift card. The patients and their families enjoyed Newk’s boxed lunches and had a great time decorating sugar cookies, dancing to holiday music and spending time with Santa and Mrs. Claus.

Special Events and Sources of Revenue

The \$10,000 Uptown Drawdown

The \$10,000 Uptown Drawdown is MKF's largest annual fundraising event with an average attendance of 500. It is a black-tie optional cocktail and hors d'oeuvre style reception with live music and a silent auction. The silent auction features an extensive collection of original artworks. The proceeds raised at the gala support the mission of MKF and stay in the state to aid Mississippians.

The 2019 \$10,000 Uptown Drawdown was held on March 2 at the Country Club of Jackson. This year's silent auction featured 45 local artists. Entertainment was provided by

The Jason Mathena Trio and The Bluz Boys Band.

Tickets were \$175 per couple, which included two tickets to the gala and one chance to win the \$10,000 Drawdown jackpot. There was a discounted price of \$100 for those in their twenties, which included two tickets to the gala and one chance to win the \$10,000 Drawdown jackpot. Additional chances to win the \$10,000 Drawdown jackpot were purchased for \$75. Chance holders did not have to be present to win.

Wilson Stribling and Kent Wilkinson were the Masters of Ceremony. Natalie and Michael Arnemann served as the 2019 \$10,000 Uptown Drawdown Chairs.

"One of my Lexington patients recently received \$100 in emergency assistance from the Mississippi Kidney Foundation for help with expenses while in housing for a transplant. She told me that the only way she and her daughter had enough for their meals was because of that \$100. Expenses for the post-discharge follow up (3 weeks) while out of town drained her savings, even with hotel discounts and some food vouchers that were given to them. The MKF's assistance allowed for her to successfully receive a transplant." **Claire Tyler, social worker, Davita Lexington**

Committees for the 2019 \$10,000 Uptown Drawdown include:

The 2020 \$10,000 Uptown Drawdown will be held on February 29 at the Country Club of Jackson in Jackson, Mississippi. Save the date!

“I have been a social worker for over 25 years. However, I am new to dialysis social work. The Mississippi Kidney Foundation is a great organization that supports patients, families, and healthcare workers with support, education, and resources. I have been amazed at how much this organization is available to provide assistance. I have thoroughly enjoyed meeting and getting to work with the staff at the Mississippi Kidney Foundation.” **Stacy Therrell, social worker, Fresenius Kidney Care North Jackson**

The Mississippi Kidney Foundation is grateful to Dr. John D. Bower and the Bower Foundation, which has provided a grant to MKF for 22 years.

Michael Rubenstein Memorial Kidney Walk

The Michael Rubenstein Memorial Kidney Walk is a 5K walk, typically held in early fall in Jackson. It is dedicated to the memory of fellow Mississippian Michael Rubenstein, who was a kidney transplant recipient.

The 2018 Michael Rubenstein Memorial Kidney Walk was held on October 6 throughout the Fondren Neighborhood in Jackson, Miss. There were over 300 participants. Sponsors of the Kidney Walk were Babalu, Fleet Feet, Fondren Fro-yo, Fondren Presbyterian Church, Mantle.City Club, McDade’s Fondren, Sneaky Beans, St. James’ Episcopal Church and Trustmark.

Registrants of the walk were encouraged to raise or donate \$50 in order to participate in the walk. Donations could be designated for a specific dialysis unit or for MKF’s free kidney screenings. Each participant who raised \$100 or more was entered in a raffle to win \$1,000 at the end of the walk.

The 2019 Michael Rubenstein Memorial Kidney Walk will be held on September 28 in the Fondren neighborhood, in Jackson, Mississippi.

Kidney Kars Program

MKF accepts donations of all vehicles, including cars, trucks, boats, etc. regardless of whether the vehicle is running. MKF provides free towing. The money raised through the car donation program helps support the over 20 patient programs and services that MKF provides.

Contributions are tax deductible to the extent of the law. 18 cars were donated to MKF in 2018–2019.
